

## General Description

You will **create** the front-end homepage with a short tagline or big hero image. A `<NavBar>` component routes users to the rest of the site. If UI/UX #1 is done, incorporate brand colors and typography; if not, use placeholders. React Router is used for multi-page navigation.

## What the Freelancer Needs / Requirements

- **React Setup**
  - Node.js (v14+), using Create React App or Vite.
- **React Router**
  - For routes: `/`, `/courses`, `/cart`, `/login`, `/admin`, etc.
- **Hero Section**
  - A banner with a CTA button leading to `/courses`.
- **Nav Bar**
  - Reusable with brand styling if available.
- **Styling**
  - Basic CSS or a library; incorporate UI/UX #1 if provided.

## Task Description

1. **Task 1**
  - **Initialize React Project**
    - e.g., `npx create-react-app edu-sure` or Vite.
    - Install `react-router-dom`.
2. **Task 2**
  - **Create Homepage (Hero)**
    - A “hero” section featuring an image or color background, tagline (“Level Up Your Skills”), a CTA button to “Browse Courses.”
3. **Task 3**
  - **Global Navigation**
    - `<NavBar>` with links to Home, Courses, Cart, Login, Admin if needed.
    - Provide minimal doc explaining route setup.
